

CUSTOM VIDEO

“Whether it’s one of our experienced instructors playing lead or you as the star on the big screen, we can create compelling, informative, and entertaining videos that will surpass your expectations.”

TTTS uses an arsenal of tools to ensure your videos stand out from the rest. Whether we are editing your videos, filming on-site, or shooting footage in our studio, the result is always the same – compelling, thoughtful, and effective videos.

Pressure Safety Video

With green screen compositing, we can transport you anywhere you can imagine – inside mechanical equipment, a virtual classroom, or the depths of space! Furthermore, adding visual effects by integrating 3D animation, motion graphics, and kinetic text will take your videos beyond what you ever thought possible.

Since most people are visual learners, it is far more impactful to present a 3D video of an exploded view of equipment than by providing only reading materials. Our videos ensure your audience not only understands the information, but can visually connect with the topic. Videos services include:

Green Screen Compositing

- **Video Recording**
 - HD shooting
 - On/Off location shooting
 - Green screen
 - Audio recording
 - Lighting setup
- **Editing**
